

HSE Award Alert 011

CERTIFICATE OF RECOGNITION

The Abu Dhabi Ports Company (ADPC) presented a certificate of recognition to Saif Bin Darwish for the outstanding health, safety & environment performance and zero incidents at the Khalifa Port Expansion Project, plot 56, 57 & related works. The certificate was awarded on the 30th of August by Ms. Samar Mohamed Yaseen, Head of Construction HSE, ADPC & Mr. John O'Dowd, Sr. Construction Manager, ADPC. The certificate was received by Mr. Venkadesh, Sr. HSE Manager, SBD.

This project was awarded in early 2016. HSE has been the highest priority in this project as all other projects in SBD. The project HSE plan was prepared to take into account of all client & legal requirements. Safe working procedures were implemented to ensure the work is being carried out without compromising the safety of individuals involved & the environment. A detailed risk assessment is carried out prior to start of work and appropriate control measures are put in place to ensure the risk is well controlled.

Due to the implementation of the best HSE standards there have been zero incidents in the project till date. The credit for this achievement goes to the Top Management, the project management team and the employees. This recognition would have not been possible without the support of the entire team.
